Ethics in Practice (Blackwell Philosophy Anthologies)

This second edition of Ethics in Practice is a comprehensive collection of more than 60 new, newly-revised, and classic essays on fourteen contemporary moral questions. Through the selection of essays, organization of sections, and incisive general and section introductions, this book integrates ethical theory and the discussion of practical moral problems. In addition to the more familiar issues, such as abortion, euthanasia, animal rights, preferential treatment, and the environment, the volume includes coverage of less familiar, but equally important issues such as immigration, political correctness, free speech, the use of drugs, world hunger, and economic justice. The second edition includes 21 essays not in the first edition, with expanded sections discussing three more topics: reproductive technologies, gun control, and capital punishment. This volume features accessible and engaging, yet philosophically rigorous essays that encourage the student to think critically about a wide range of practical moral issues. The supporting website at <http://www.stpt.usf.edu/hhl/papers/ethics.in.practice.2nd.htm> contains extensive links to sources on the topics, ethical theories, and guides on writing papers. These features make Ethics in Practice the ideal text for introductory and applied ethics courses.
