Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) Il-Chul Moon, Kathleen M. Carley, Tag Gon Kim

Commanding and controlling organizations in extreme situations is a challenging task in military, intelligence, and disaster management. Such command and control must be quick, effective, and considerate when dealing with the changing, complex, and risky conditions of the situation. To enable optimal command and control under extremes, robust structures and efficient operations are required of organizations. This work discusses how to design and conduct virtual experiments on resilient organizational structures and operational practices using modeling and simulation. The work illustrates key aspects of robustly networked organizations and modeled performance of human decision-makers through examples of naval-air defense, counterterrorism operations, and disaster responses.

From reader reviews:

Rodney Sierra:

Book is definitely written, printed, or highlighted for everything. You can learn everything you want by a e-book. Book has a different type. As we know that book is important matter to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A publication Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) will make you to end up being smarter. You can feel more confidence if you can know about anything. But some of you think this open or reading some sort of book make you bored. It is not make you fun. Why they may be thought like that? Have you in search of best book or appropriate book with you?

William Ullrich:

Often the book Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) will bring someone to the new experience of reading any book. The author style to explain the idea is very unique. Should you try to find new book to read, this book very acceptable to you. The book Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) is much recommended to you you just read. You can also get the e-book from your official web site, so you can more readily to read the book.

Deborah Allen:

Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) can be one of your starter books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to place every word into satisfaction arrangement in writing Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) however doesn't forget the main place, giving the reader the hottest and based confirm resource info that maybe you can be certainly one of it. This great information could drawn you into completely new stage of crucial contemplating.

Lola Hernandez:

Reserve is one of source of expertise. We can add our expertise from it. Not only for students but native or citizen have to have book to know the upgrade information of year in order to year. As we know those guides have many advantages. Beside many of us add our knowledge, could also bring us to around the world. With the book Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science) we can consider more advantage. Don't you to be creative people? Being creative person must love to read a book. Simply choose the best book that suitable with your aim.

Don't become doubt to change your life at this time book Modeling and Simulating Command and Control: For Organizations Under Extreme Situations (SpringerBriefs in Computer Science). You can more desirable than now.
