Educational Planning and Management in Small States: Concepts and Experiences (Challenge of Scale)

Educational Planning and Management in Small States: Concepts and Experiences (Challenge of Scale)

This book presents the critical reflections of eighteen senior working officials working in twelve small states on the management and planning of education. Their comments are driven by the insights they gained as adult participants in a unique post-graduate program at the University of Malta devised by, and for, the distinct small-scale imagination.

The first part of the book deals with educational management issues, addressing the education process from an internal operational perspective. (Total Quality Management, staff recruitment and appraisal, job satisfaction, stress management and the multifunctionality of incumbents are key considerations.) The second section looks at educational planning. It considers the influence and role of educational planning in general, and looks at particular challenges to teaching staff, school-business linkages, and those presented by primary, secondary, vocational and adult education.
