Absorption Chillers and Heat Pumps

Keith Herold, Reinhard Radermacher, Sanford A. Klein

Absorption Chillers and Heat Pumps Keith Herold, Reinhard Radermacher, Sanford A. Klein

This book offers an in-depth description of absorption chillers and heat pumps, focusing on relatively simple systems that employ working fluids in the liquid and vapor phase. The book provides a thorough explanation of how thermodynamic and transport properties of working fluid mixtures enable them to influence the performance of absorption systems. The student or engineer who is a newcomer to the field will gain a comprehensive knowledge essential for the design and evaluation of absorption systems.

This book establishes a solid background in general thermodynamics for the reader. The properties of working fluid mixtures pertaining to absorption working fluid combinations are discussed, and various thermodynamic diagrams are introduced and explained. Water/lithium-bromide and ammonia/water absorption chillers and heat pumps are described, and their features and characteristics are detailed. Measures for improving efficiency are presented, and internal heat exchange options are analyzed.

Absorption Chillers and Heat Pumps contains extensive examples. It also includes a demonstration copy of the Engineering Equation Solver (EES) program and program files for all of the examples in the text. Problems are listed at the end of major chapters. This unique book is a superior upper-level textbook for students, and a valuable reference source for engineers.

From reader reviews:

Janie Ross:

Nowadays reading books be than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge your information inside the book that improve your knowledge and information. The details you get based on what kind of reserve you read, if you want drive more knowledge just go with knowledge books but if you want experience happy read one having theme for entertaining for example comic or novel. The actual Absorption Chillers and Heat Pumps is kind of publication which is giving the reader capricious experience.

Adrian Kao:

The book untitled Absorption Chillers and Heat Pumps contain a lot of information on the idea. The writer explains your girlfriend idea with easy means. The language is very simple to implement all the people, so do certainly not worry, you can easy to read that. The book was authored by famous author. The author will bring you in the new period of time of literary works. It is easy to read this book because you can continue reading your smart phone, or device, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site along with order it. Have a nice examine.

Shirley Davenport:

This Absorption Chillers and Heat Pumps is brand new way for you who has curiosity to look for some information as it relief your hunger of information. Getting deeper you upon it getting knowledge more you know or you who still having small amount of digest in reading this Absorption Chillers and Heat Pumps can be the light food for you personally because the information inside this particular book is easy to get by simply anyone. These books develop itself in the form that is reachable by anyone, that's why I mean in the e-book web form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book style for your better life along with knowledge.

Jeannine Lawson:

Reserve is one of source of information. We can add our know-how from it. Not only for students and also native or citizen need book to know the update information of year to year. As we know those books have many advantages. Beside we all add our knowledge, can bring us to around the world. By the book Absorption Chillers and Heat Pumps we can consider more advantage. Don't someone to be creative people? To get creative person must want to read a book. Just simply choose the best book that acceptable with your aim. Don't be doubt to change your life at this time book Absorption Chillers and Heat Pumps. You can more pleasing than now.
