Provide the student with a sharp pencil, eraser, a set of sharp colored pencils and a smooth black pen. The student will be able to use logic intuitively to complete each mind game, art game or puzzle. Use one or more pages per day. Provide the student with a peaceful place to work and be available to encourage the student if needed.

Additional art games and activities are found on many pages to keep the creative area of the mind engaged in the mathematical process.

This book is based on Book 6 of Dyslexia Games Series C. It does have several extra pages with a multiplication table for the child to fill in. If you have a child who can not memorize using flash cards, they may need to fill out the table over and over. This book uses logic, art and repetition to teach the math facts.

The book was created by a mother of children with dyslexia and memory problems - therefore the way this book is organized works very well for children with these challenges. The book may be too repetitive for some students because of the extra multiplication tables. Use the blank multiplication tables until the child can fill it out effortlessly, and then return to the book in the future to sharpen the skill.
