Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction

Catherine Twomey Fosnot

Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction Catherine Twomey Fosnot

In our efforts to reform mathematics education, we've learned a tremendous amount about young students' strategies and the ways they construct knowledge, without fully understanding how to support such development over time. The Dutch do. So, funded by the NSF and Exxon, Mathematics in the City was begun, a collaborative inservice project that pooled the best thinking from both countries. In *Young Mathematicians at Work*, Catherine Fosnot and Maarten Dolk reveal what they learned after several years of intensive study in numerous urban classrooms.

The first in a three-volume set, *Young Mathematicians at Work* focuses on young children between the ages of four and eight as they construct a deep understanding of number and the operations of addition and subtraction. Rather than offer unrelated activities, Fosnot and Dolk provide a concerted, unified description of development, with a focus on big ideas, progressive strategies, and emerging models. Drawing from the work of the Dutch mathematician Hans Freudenthal, they define mathematics as "mathematizing" - the activity of structuring, modeling, and interpreting one's "lived world" mathematically. And they describe teachers who use rich problematic situations to promote inquiry, problem solving, and construction, and children who raise and pursue their own mathematical ideas.

In contrast to other books on math reform, *Young Mathematicians at Work* provides a new look at the teaching of computation. It moves beyond the current debate about algorithms to argue for deep number sense and the development of a repertoire of strategies based on landmark numbers and operations. Sample minilessons on the use of the open number line model are provided to show you how to support the development of efficient computation.

From reader reviews:

David Butler:

Do you certainly one of people who can't read pleasant if the sentence chained inside straightway, hold on guys that aren't like that. This Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction book is readable by means of you who hate the perfect word style. You will find the data here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to provide to you. The writer associated with Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the content but it just different by means of it. So , do you nevertheless thinking Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction is not loveable to be your top listing reading book?

Ronda Caesar:

Nowadays reading books be than want or need but also turn into a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with education and learning books but if you want sense happy read one with theme for entertaining like comic or novel. The particular Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction is kind of guide which is giving the reader capricious experience.

Blake Westerman:

Reading a reserve tends to be new life style on this era globalization. With examining you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Many author can inspire their own reader with their story or maybe their experience. Not only the story that share in the guides. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their ability in writing, they also doing some research before they write on their book. One of them is this Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction.

Alan Sarno:

You may get this Young Mathematicians at Work: Constructing Number Sense, Addition, and Subtraction by check out the bookstore or Mall. Just viewing or reviewing it can to be your solve issue if you get difficulties for the knowledge. Kinds of this e-book are various. Not only by means of written or printed but in addition can you enjoy this book by simply e-book. In the modern era just like now, you just looking by your mobile phone and searching what your problem. Right now, choose your personal ways to get more

information about your book. It is most important to arrange yourself to make your knowledge are still up-to-date. Let's try to choose appropriate ways for you.
