Watch the ASQ:SE-2 webinar series!

The ASQ:SE-2™ questionnaires are the most cost-effective, reliable way to screen young children for social-emotional issues in the first 6 years of life. Now in a NEW second edition, the 9 age-appropriate questionnaires (2, 6, 12, 18, 24, 30, 36, 48, and 60 months) effectively screen 7 key social-emotional areas: self-regulation, compliance, adaptive functioning, autonomy, affect, social-communication, and interaction with people.

What's New in ASQ:SE-2

ASQ:SE-2 questionnaires are better than ever, with helpful new features like:

- **New 2 month questionnaire:** Reliably screen and start monitoring children as young as 1 month, so critical interventions can start earlier.
- **Screen through kindergarten:** Now you can screen children from 1–72 months with no gaps, so you can use ASQ:SE-2 through kindergarten and the transition to school.
- **New behavior and communication items** designed to elicit parent concerns that may point to autism and early communication issues.
- **New data and cutoffs:** ASQ:SE-2 is based on updated research and a large sample size of more than 14,000 diverse children.
- **New monitoring zone** that clearly identifies children who are close to the cutoff and should be monitored and rescreened.
- **Questionnaire items revised and refined** based on user feedback, to help parents provide the best responses.
- **Sturdy, convenient new box** with a handle for easy portability.

How to Use ASQ:SE-2 Questionnaires

Fast and easy to use, ASQ:SE-2 questionnaires take just 10–15 minutes for parents to complete. First, parents fill out the questionnaire, checking the response that best describes their child's behavior: *often or always, sometimes, or rarely or never*. Clear questions help parents complete the questionnaires quickly and accurately, and open-ended questions ask about any related parental concerns. Professionals score the questionnaire in just 2–3 minutes, and then transfer a total score to a simple summary sheet along with any concerns the parent has noted. The summary sheet, a visual indicator of social emotional development and

parent concerns, indicates whether any followup should be considered.

- Total scores that fall in the graphâ€™s range of Risk(**dark shaded zone**) indicate the child may need further evaluation.
- **NEW!** A total score in the **new â€œmonitoringâ€• zone (light shaded area)** helps identify children that may require followup actions based on items of concern. Professionals can work with parents to address behaviors of concern and provide social-emotional development information sheets and activities to help their child make progress before the next screening.
- Scores **outside the shaded zones** mean the childâ€™s social-emotional development appears to be developing on schedule. Parents can monitor their childâ€™s development by rescreening at the next ASQ:SE-2 interval.

When you purchase a box of ASQ:SE-2 questionnaires, youâ€™ll get photocopiable master copies on paper *and* printable PDF master copies on CD-ROM—so you and your staff will always have the format you want, right at your fingertips.

Convenient, easy online completion and management for ASQ:SE-2 questionnaires are both available with the purchase of ASQ Online. ASQ:SE-2 questionnaires are **also available in Spanish**. Learn more about ASQ:SE-2 and its companion developmental screener, ASQ-3™ —the valid, reliable, and trusted tool for screening children during the crucial first 5½ years of life.
