Temporal Geographical Information Systems: Advanced Functions for Field-Based Applications

George Christakos, Patrick Bogaert, Marc Serre

The book focuses on the development of advanced functions for field-based Temporal Geographical Information Systems (TGIS). These fields describe natural, epidemiological, economic, and social phenomena distributed across space and time. The book is organized around 4 main themes: concepts, mathematical tools, computer programs, and applications.

The reader is also familiarized with the TGIS toolbox of advanced functions and the associated library of comprehensive computer programs, BMELib.
