Giant Pandas: Biology and Conservation

Giant Pandas: Biology and Conservation

The much-loved giant panda, a secretive denizen of the dense bamboo forests of western China, has become an icon worldwide of progress in conservation and research. This volume, written by an international team of scientists and conservationists including Chinese researchers whose work has not been available in English, tells the promising story of how the giant panda returned from the brink of extinction. The most important sourcebook on giant pandas to date, it is the first book since 1985 to present current panda research and the first to place the species in its biological, ecological, and political contexts. More than a progress report on a highly endangered species, *Giant Pandas: Biology and Conservation* details the combination of scientific understanding, local commitment, and government involvement that has been brought into play and asks what more needs to be done to ensure the panda's survival.

The book is divided into four parts—Evolutionary History of the Giant Panda, Studies of Giant Panda Biology, Pandas and Their Habitats, and Giant Panda Conservation. It combines the latest findings from the field and the laboratory together with panel and workshop summaries from a recent international conference. Taken together, the chapters highlight how international cooperation has led to better management in the wild and in captivity. The volume also shows how concepts such as buffer zones, links between forest fragments, multiple-use areas, and cooperation with local people who have a stake in the resources—highly relevant concepts for conservation problems around the world—have been key to the panda's survival.

From reader reviews:

Nelson Gendron:

What do you consider book? It is just for students because they are still students or that for all people in the world, exactly what the best subject for that? Merely you can be answered for that concern above. Every person has distinct personality and hobby for every other. Don't to be compelled someone or something that they don't desire do that. You must know how great and also important the book Giant Pandas: Biology and Conservation. All type of book are you able to see on many resources. You can look for the internet sources or other social media.

Carolyn Baird:

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important for people. The book Giant Pandas: Biology and Conservation has been making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The reserve Giant Pandas: Biology and Conservation is not only giving you much more new information but also to become your friend when you really feel bored. You can spend your spend time to read your e-book. Try to make relationship together with the book Giant Pandas: Biology and Conservation. You never feel lose out for everything should you read some books.

Timothy Hawkins:

Playing with family in the park, coming to see the marine world or hanging out with pals is thing that usually you may have done when you have spare time, then why you don't try point that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Giant Pandas: Biology and Conservation, it is possible to enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't buy it, oh come on its known as reading friends.

Pauline Stern:

Book is one of source of knowledge. We can add our understanding from it. Not only for students but native or citizen will need book to know the upgrade information of year in order to year. As we know those textbooks have many advantages. Beside most of us add our knowledge, can bring us to around the world. Through the book Giant Pandas: Biology and Conservation we can get more advantage. Don't someone to be creative people? To be creative person must want to read a book. Merely choose the best book that ideal with your aim. Don't be doubt to change your life at this time book Giant Pandas: Biology and Conservation. You can more appealing than now.
