Seeing Double: Shared Identities in Physics, Philosophy, and Literature Peter Pesic

The separateness and connection of individuals is perhaps the central question of human life: What, exactly, is my individuality? To what degree is it unique? To what degree can it be shared, and how? To the many philosophical and literary speculations about these topics over time, modern science has added the curious twist of quantum theory, which requires that the elementary particles of which everything consists have no individuality at all. All aspects of chemistry depend on this lack of individuality, as do many branches of physics. From where, then, does our individuality come? In *Seeing Double*, Peter Pesic invites readers to explore this intriguing set of questions. He draws on literary and historical examples that open the mind (from Homer to Martin Guerre to Kafka), philosophical analyses that have helped to make our thinking and speech more precise, and scientific work that has enabled us to characterize the phenomena of nature. Though he does not try to be all-inclusive, Pesic presents a broad range of ideas, building toward a specific point of view: that the crux of modern quantum theory is its clash with our ordinary concept of individuality. This represents a departure from the usual understanding of quantum theory. Pesic argues that what is bizarre about quantum theory becomes more intelligible as we reconsider what we mean by individuality and identity in ordinary experience. In turn, quantum identity opens a new perspective on us.

From reader reviews:

Marie Griffin:

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each e-book has different aim or perhaps goal; it means that publication has different type. Some people feel enjoy to spend their time to read a book. These are reading whatever they have because their hobby is usually reading a book. Think about the person who don't like looking at a book? Sometime, man or woman feel need book after they found difficult problem or maybe exercise. Well, probably you'll have this Seeing Double: Shared Identities in Physics, Philosophy, and Literature.

Christopher Hill:

Nowadays reading books become more than want or need but also get a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book which improve your knowledge and information. The info you get based on what kind of book you read, if you want get more knowledge just go with education books but if you want truly feel happy read one along with theme for entertaining including comic or novel. Typically the Seeing Double: Shared Identities in Physics, Philosophy, and Literature is kind of book which is giving the reader unstable experience.

Norman Fuentes:

Information is provisions for folks to get better life, information presently can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider when those information which is inside former life are hard to be find than now's taking seriously which one would work to believe or which one typically the resource are convinced. If you find the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Seeing Double: Shared Identities in Physics, Philosophy, and Literature as your daily resource information.

Deborah Fishman:

Playing with family in a park, coming to see the marine world or hanging out with close friends is thing that usually you could have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Seeing Double: Shared Identities in Physics, Philosophy, and Literature, you could enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.
