Emerging Areas of Human Rights in the 21st Century: The Role of the Universal Declaration of Human Rights (Routledge Research in Human Rights Law)

This book includes a set of studies and reflections that have emerged since the adoption of the Universal Declaration of Human Rights in 1948. Encompassing a number of human rights, such as the right to environmental protection, the right to humanitarian aid, and the right to democratic governance, this collection focuses on issues and areas that were not originally mentioned or foreseen in the Declaration but that have since developed into salient topics.

These developing rights are considered in the light of contemporary national and international law, as well as against the wider picture and the contexts in which human rights may have effect. Moreover, the topics covered take in a wide range of research fields, including law, politics and criminology.

Emerging Areas of Human Rights in the 21st Century is aimed primarily at undergraduate and postgraduate students, and scholars interested in international law, human rights and politics.
