## **Build A Solar Hydrogen Fuel Cell System Phillip Hurley**

Learn how to construct and operate the components of a solar hydrogen fuel cell system: the fuel cell stack, the electrolyzer to generate hydrogen fuel, simple hydrogen storage, and solar panels designed specifically to run electrolyzers for hydrogen production. Complete, clear, illustrated instructions to build all the major components make it easy for the non-engineer to understand and work with this important new technology.

Featured are the author's innovative and practical designs for efficient solar powered hydrogen production including:

ESPMs (Electrolyzer Specific Photovoltaic Modules) – 40 watt solar panels designed specifically to run electrolyzers efficiently;

a 40-80 watt electrolyzer for intermittent power from renewable energy sources such as solar and wind;

and, a 6-12 watt planar hydrogen fuel cell stack to generate electricity.

Any of these components can be ganged or racked, or scaled up in size for higher output.

You'll also learn how to set up an entire gas processing system, and where to find parts and materials – everything you need for an experimental stationary unit that will give you a solid base for building and operating systems for larger power needs. There are even schematics for adapting conventional solar panels (BSPMs – Battery Specific Photovoltaic Modules) for efficient hydrogen production, and setting up hybrid (battery and fuel cell) PV systems.

Build a Solar Hydrogen Fuel Cell System has over 135 photos and illustrations, as well as 5 templates for a planar fuel cell stack.

\*NOTE\* If you have never constructed a fuel cell before, we recommend you first study Build Your Own Fuel Cells by the same author, before you attempt to build the planar fuel cell stack.

### **From reader reviews:**

#### **Leticia Cantrell:**

Have you spare time for any day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a walk, shopping, or went to typically the Mall. How about open or perhaps read a book entitled Build A Solar Hydrogen Fuel Cell System? Maybe it is to get best activity for you. You know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with the opinion or you have different opinion?

#### **Virgil Arriola:**

Do you certainly one of people who can't read pleasant if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Build A Solar Hydrogen Fuel Cell System book is readable by means of you who hate those straight word style. You will find the information here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to deliver to you. The writer associated with Build A Solar Hydrogen Fuel Cell System content conveys the thought easily to understand by most people. The printed and e-book are not different in the information but it just different by means of it. So , do you still thinking Build A Solar Hydrogen Fuel Cell System is not loveable to be your top record reading book?

#### **Wilson Gonzalez:**

Nowadays reading books are more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want drive more knowledge just go with knowledge books but if you want really feel happy read one together with theme for entertaining for instance comic or novel. The actual Build A Solar Hydrogen Fuel Cell System is kind of guide which is giving the reader unforeseen experience.

#### **Robert Alston:**

You are able to spend your free time to see this book this guide. This Build A Solar Hydrogen Fuel Cell System is simple to deliver you can read it in the playground, in the beach, train as well as soon. If you did not possess much space to bring the particular printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.
