## **The Fever: How Malaria Has Ruled Humankind for 500,000 Years** Sonia Shah

In recent years, malaria has emerged as a cause celebre for vogueish philanthropists. Bill Gates, Bono, and Laura Bush are only a few of the personalities who have lent their names--and opened their pocketbooks--in hopes of stopping the disease. Still, in a time when every emergent disease inspires waves of panic, why aren't we doing more to tame one of our oldest foes? And how does a pathogen that we've known how to prevent for more than a century still infect 500 million people every year, killing nearly one million of them?

In *The Fever*, journalist Sonia Shah sets out to answer those questions, delivering a timely, inquisitive chronicle of the illness and its influence on human lives. Through the centuries, she finds, we've invested our hopes in a panoply of drugs and technologies, and invariably those hopes have been dashed. From the settling of the New World to the construction of the Panama Canal, through wartimes and the advances of the Industrial Revolution, Shah tracks malaria's jagged ascent and the tragedies in its wake, revealing a parasite every bit as persistent as the insects that carry it.

With distinguished prose and original reporting from Panama, Malawi, Cameroon, India, and elsewhere, *The Fever* captures the curiously fascinating, devastating history of this long-standing thorn in the side of humanity.
